| The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply | | | | | | |
| A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). | | | | | | |

DETAILED ACTION

Response to Amendment

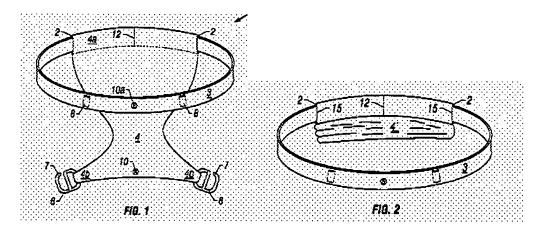

1. This is in response to amendment filed 05/23/05. Claims 1, 4, 5, 8 and 14 have been amended. Claims 1-14 are finally rejected below.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1, 2 and 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Holland (US 5,991,920).

In regard to Claims 1 and 2, Holland provides a swimsuit (1) having a loop (3) adapted to completely encircle a human waist. A fastening device (10) which couples a first part of the swimsuit body (4) to a second part of the swimsuit body (3). A storage compartment (2) on the swimsuit body (4) for compactly stowing the body (4). The loop

Art Unit: 3765

(3) is positioned relative to the swimsuit body (4) so that when the fastening device (10, 10a) is engaged the swimsuit (1) can be secured on a user's body.

In regard to Claim 5, Holland provides a method of removing part of a swimsuit body (4) that is separable at one point by a fastening device (10, 10a) while leaving the swimsuit loop (3) attached to a human body. Decoupling the fastening device (10, 10a) on a body of the swimsuit (4) and separating a first part of the body of the swimsuit from a second part of the body of the swimsuit, compacting the body of the swimsuit (4) into a small space and storing the compacted body of the swimsuit using at least one storage compartment (2) on the body of the swimsuit (4). Finally, using the loop (3) that encircles the user for supporting the swimsuit (1) while compacted in the storage compartment (2) on the user.

In regard to Claim 6, Holland provides the method of compacting the body (4) of the swimsuit (1) using the at least one storage compartment (2) and storing through an opening (12) at an end of the storage compartment (2).

In regard to Claim 7, Holland provides the at least one storage compartment (2) comprises two storage compartments (column 2, lines 29-41).

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 3, 4 and 11-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Holland.

Holland provides a collapsible swimsuit (1) as described above in claims 1 and 8. However, Holland fails to teach the loop being a decorative chain that is resistant to corrosion and the front of the swimsuit having a greater width than the back of the swimsuit.

In regard to Claims 3, 4, 13 and 14, Holland provides a loop (3) comprises an elastic material and a tubular member (column 2, lines 26-29).

At the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to having provided the loop in a chain material that is resistant to corrosion because Applicant has not disclosed that providing the loop in a chain material that is resistant to corrosion provides an advantage, is used for a particular purpose, or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with the loop being any material including an elastic fabric material or a chain that is resistant to corrosion because as long as the loop secures the swimsuit to the user's waist it can be made out of any material as desired. Therefore, it would have been an obvious matter of design choice to modify Holland to obtain the invention as specified in claims 3, 4, 13 and 14.

In regard to Claims 11 and 12, Holland provides a swimsuit (1) comprising a loop (3) adapted to completely encircle a human waist. A body (4) having a front end and a rear end and a rear end (figure 1). A fastener (10, 10a) for detachable coupling the rear

Art Unit: 3765

end of the body (4) to the loop and a storage compartment (2) on the front of the swimsuit (1) for compactly stowing the body (4). The loop (3) is positioned relative to the swimsuit body (4) so that when the fastener (10, 10a) is attached the swimsuit (1) may be worn by a user. Further, Holland teaches the front end of the swimsuit body having a greater width than the rear of the swimsuit body (see figure 1, the end of the suit with storage pocket (2) is the front end and the back end is the end with the fastener (10), as seen in figure 1, the end with the pocket has a greater width than the end with the fastener.).

Allowable Subject Matter

6. Claims 8-10 are allowed over prior art.

Response to Arguments

7. Applicant's arguments filed 05/23/05 have been fully considered but they are not persuasive. Applicant argues that Holland fails to teach the fastening device coupling the first part of the swimsuit body from a second swimsuit body.

Examiner notes that as constructed in claim 1 and 5 the loop can be considered a second part of the swimsuit body. Therefore the amended limitations of claim 1 and 5 do not overcome the rejection based on Holland.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3765

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alissa L. Hoey whose telephone number is (571) 272-4985. The examiner can normally be reached on M-F (8:00-5:30)Second Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Calvert can be reached on (571) 272-4983. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
